

College Comparison Worksheet

Use this worksheet to list the positives and negatives for each college you are deciding between. Once you're done, total up the number of Pro's listed and then subtract the number of Con's to determine the Total for this college. Do the same for each finalist and then enter your score in the [college scoreboard](#) to determine which college has the highest number of points.

College:

	Pro's (+)	Con's (-)
